Since 1848, The Knapheide Manufacturing Company has continued to be an industry leader, with a vast distribution network and expert staff ready to help.

COMMITMENT TO CORROSION RESISTANCE

Corrosion shouldn't be a concern when you buy quality Knapheide products. To give you the best protection from corrosion, we installed our state-of-the-art, custom-designed electrodeposition prime paint system.

Our E-coat system bonds prime paint to steel by an electroplating process, to give you a superior coat of primer resulting in better corrosion protection compared to spraying methods. Complete immersion in our E-coat results in a prime coat that provides the best chemical and solvent resistance.

Because of our commitment to corrosion resistance, you should never worry about the quality of your Knapheide products.
